

IBM Storage Management Pack for Microsoft System
Center Operations Manager (SCOM)
Version 2.4.0

Release Notes

First Edition (June 2015)

This edition applies to version 2.4.0 of the IBM Storage Management Pack for Microsoft System Center Operations Manager software package. Newer document editions may be issued for the same product version in order to add missing information or amend typographical errors. The edition is reset to 'First Edition' for every new product version.

Overview

The IBM® Storage Management Pack for Microsoft System Center Operations Manager (SCOM) is a set of software modules, or management packs, which allow you to access and monitor IBM storage systems using the host-based Microsoft SCOM interface.

Each individual management pack includes modules for monitoring the storage system's alerts, events, health state, physical components, and logical components. In addition, graphic diagrams show a visual representation of the hierarchy and relationship of selected storage system components, with more detailed information.

You can download the IBM Storage Management Pack for Microsoft SCOM software package at any time from the IBM Fix Central website (www.ibm.com/support/fixcentral).

In addition, a downloadable application is available on the Microsoft PinPoint website (pinpoint.microsoft.com/en-us/applications/ibm-storage-management-pack-for-microsoft-system-center-operations-manager-12884958381).

Compatibility and requirements

This section specifies the compatibility and requirements of version 2.4.0 of the IBM Storage Management Pack for Microsoft SCOM.

Supported operating systems

The IBM Storage Management Pack for Microsoft SCOM can be installed on any Microsoft Windows or Windows Server operating system that is supported by the Microsoft SCOM version that you are using.

Note: This version of the IBM Storage Management Pack for Microsoft SCOM can be installed on all site servers that run SCOM agents, in addition to the regular installation on the SCOM management server.

- For a complete list of operating systems supported by Microsoft System Center Operations Manager 2012 (including SP1 and R2), see the Microsoft System Center Operations Manager 2012 technical information website (technet.microsoft.com/en-us/library/hh205990.aspx).

Supported storage systems

The IBM Storage Management Pack for Microsoft SCOM supports different IBM storage systems, as listed in the following table.

Important: The IBM Storage Management Pack for Microsoft SCOM can detect the following IBM storage systems over IPv4 connections only.

Storage system	Microcode version	Compatibility note
IBM XIV [®] Storage System	10.2.2, 10.2.4.x 11.0.0, 11.1.x, 11.2.x, 11.3.x, 11.4.x, 11.5.x, 11.6.x	N/A
IBM Spectrum Accelerate	11.5.0.b	
IBM Storwize [®] V3500	6.4.1 7.1, 7.2, 7.3, 7.4, 7.5	N/A
IBM Storwize V3700	6.4.1 7.1, 7.2, 7.3, 7.4, 7.5	N/A
IBM Storwize V5000	7.2, 7.3, 7.4, 7.5	N/A
IBM Flex System [®] V7000	6.4.x 7.1, 7.2	N/A
IBM Storwize V7000	6.1, 6.2, 6.3, 6.4 7.1, 7.2, 7.3, 7.4, 7.5	N/A
IBM Storwize V7000 Unified	1.4.2, 1.4.3, 1.5.0	Only block storage is supported. File shares and file systems are not supported.
IBM SAN Volume Controller	6.1, 6.2, 6.3, 6.4 7.1, 7.2, 7.3, 7.4, 7.5	N/A
IBM DS8700	5.4.3, 5.5.1, 6.x 7.0, 7.1, 7.2, 7.3, 7.4, 7.5	N/A
IBM DS8800	5.4.3, 5.5.1, 6.x 7.0, 7.1, 7.2, 7.3, 7.4, 7.5	N/A
IBM DS8870	7.0, 7.1, 7.2, 7.3, 7.4, 7.5	N/A
IBM CIM Agent for DS8000 [®] Open API	5.4.3, 5.5.1, 5.6.x	Applies to the embedded DS CIM agent version
	5.7.0, 5.7.1, 5.7.2, 5.7.4	
	5.4.0	Applies to the proxy DS CIM agent version

Attention: Although the proxy DS8000 CIM agent supports IBM DS8000, IBM DS6000™, and IBM Enterprise Storage Server[®] (ESS) systems, the DS6000 and ESS systems are not supported by the IBM Storage Management Pack for Microsoft SCOM.

Required software on the host

Prior to installing the IBM Storage Management Pack for Microsoft SCOM, one of the following Microsoft SCOM versions must be installed on the host system.

- Microsoft System Center Operations Manager 2012
- Microsoft System Center Operations Manager 2012 SP1
- Microsoft System Center Operations Manager 2012 R2

Change log

This section summarizes the changes made in different version releases of the IBM Storage Management Pack for Microsoft SCOM.

Version 2.4.0 (June 2015)

Version 2.4.0 includes the following enhancements and fix:

Ticket ID	Description
SCOM-261245	Enhancement: Support added for IBM Storwize V3500 7.5, IBM Storwize V3700 7.5, IBM Storwize V5000 7.5, IBM Storwize V7000 7.5, and IBM SAN Volume Controller 7.5. Additionally, minimal VVOL support added for those releases.
SCOM-261244	Enhancement: Support added for IBM XIV Storage System 11.6.x, with minimal VVOL support. Also, compression visibility support added.
SCOM-261248	Enhancement: Support added for IBM Spectrum Accelerate 11.5.0.b.
SCOM-261242	Fixed: The status of the SAN Volume Controller iSCSI port or Storwize iSCSI port is incorrect if the port is configured and the state of the link is not active.

Version 2.3.0 (December 2014)

Version 2.3.0 adds support for the XIV multi-tenancy feature.

Additional enhancements and fixes in version 2.3.0:

Ticket ID	Description
SCOM-261212	Enhancement: Added support for the XIV multi-tenancy feature, which applies only to XIV microcode version 11.5 or later (non-domain users have access only when the access policy is set to "Open").
SCOM-261162	Fixed: For SAN Volume Controller and Storwize systems, cluster monitoring is dependent on FlashCopy® consistency group unit monitoring, while single system monitoring is dependent on array unit monitoring. If either of the required unit monitoring is not used, the cluster or system monitoring returns to the uninitialized state.
SCOM-261241	Fixed: Updated the IBM Storage Solutions External Runtime Components (previously named "XPyV") to version 1.4.4 to resolve man-in-the-middle (MITM) security attacks.

Version 2.2.1 (June 2014)

Version 2.2.1 resolved the following critical issue.

Ticket ID	Description
SCOM-261210	Fixed: OpenSSL security vulnerability (also known as the Heartbleed bug) could have an impact on the connection to storage systems. Version 2.2.1 uses OpenSSL version 1.0.1h, which resolves this security issue.

Version 2.2.0 (December 2013)

Version 2.2.0 added support for the following storage systems:

- IBM Storwize V5000
- IBM Storwize V7000 Unified

Version 2.2.0 also added support for newer microcode versions of the previously supported storage systems (see “Supported storage systems” on page 1), and for:

- Microsoft Windows Server 2012 R2
- Microsoft System Center Operations Manager 2012 R2

Additional changes in version 2.2.0:

Ticket ID	Description
SCOM-261154	Fixed: For XIV storage systems, only one volume is displayed as a logical component in SCOM if there are two or more volumes that share the same name with different uppercase and lowercase letters.

Version 2.1.0 (July 2013)

Version 2.1.0 added support for the IBM Storwize V3700 and IBM Storwize V3500 storage systems, and for newer microcode versions of the already supported storage systems.

Additional changes in version 2.1.0:

Ticket ID	Description
SCOM-249670	Enhancement: Only active alerts are provided in the alerts view. Closed alerts are filtered out.
SCOM-255587	Enhancement: Support for device type renaming.
SCOM-255882	Enhancement: IBM Hyper-Scale Mobility (online volume migration) operations can now be monitored for XIV systems of microcode 11.3 or later.
SCOM-238291	Fixed: When the IBM Storage Management Pack is installed on a SCOM agent and the connected storage system has a large amount of volumes (about 300 volumes per storage system), the discovery data package may exceed the SCOM size limit (4MB).

Ticket ID	Description
SCOM-242651	Fixed: XIV remote mirroring information cannot be viewed from SCOM if the user account is not defined on the XIV storage system as a storage administrator.

Note: If you are upgrading to version 2.1.0 by installing it over version 1.1.1, run the **upgrade_config.cmd** CLI utility after version 2.1.0 is installed. For more information, refer to the user guide.

Version 1.3.0 (November 2012)

Version 1.3.0 added support for the IBM Flex System V7000 storage system.

Additional changes in version 1.3.0:

Ticket ID	Description
SCOM-243094	Enhancement: Event IDs are now assigned to each SCOM event that is related to the SAN Volume Controller storage system. This allows event filtering and classification based on these event IDs.
SCOM-244312	Enhancement: All class objects in the IBM Storage Management Packs are now public class objects (rather than private class objects), allowing easier customization of alert rules.
SCOM-244842	Enhancement: The severity level of different events can be changed using the scomu.cmd utility. For more information, refer to the user guide.

Version 1.2.0 (September 2012)

Version 1.2.0 added support for Microsoft System Center Operations Manager 2012 and for microcode version 6.4.0 of the IBM Storwize V7000 and IBM System Storage® SAN Volume Controller storage systems.

Additional changes in version 1.2.0:

Ticket ID	Description
SCOM-22085	Enhancement: Secure storage of passwords and passphrases that are used for connection to IBM storage systems.
SCOM-205094	Enhancement: SAN Volume Controller of microcode version 6.3.0 or later can be logged into with user and passphrase credentials, without needing an SSH key in addition.
SCOM-205099	Enhancement: The IBM Storage Solutions External Runtime Components (previously named "XPyV") are now integrated within the IBM Storage Management Pack code, rather than installed separately.
SCOM-208786	Enhancement: The name of a connected XIV storage system is now displayed in Disk View and additional information panes.

Ticket ID	Description
SCOM-210304	Enhancement: Complete mapping of event types (information, warning, error) for Storwize V7000 and SAN Volume Controller.
SCOM-210312	Enhancement: Multiple storage systems are automatically detected in parallel.
SCOM-210314	Enhancement: The IBM Storage Management Pack can now be installed on all site servers that run SCOM agents, in addition to regular installation on the SCOM management server. This allows monitoring data to be collected by each SCOM agent service, which then sends the data to the SCOM management server.
SCOM-232514	Enhancement: A SCOM alert message is displayed if a storage system becomes unavailable.
SCOM-54232	Fixed: The passphrase required for certain SSH connections with Storwize V7000 and SAN Volume Controller cannot be entered.

Version 1.1.1 (September 2011)

Version 1.1.1 added support for:

- Version 11.0.0 of the IBM XIV microcode (XIV Gen3).
- Versions 6.2.0 and 6.3.0 of the IBM Storwize V7000 and IBM SAN Volume Controller microcode.

Version 1.1.0 (December 2010)

Version 1.1.0 was the first release of the IBM Storage Management Pack for Microsoft SCOM.

Known issues

This section details the known issues in version 2.4.0, along with possible workarounds (if workarounds are available).

Note:

- For comprehensive information about known issues in Microsoft System Center Operations Manager 2012, see the Microsoft System Center Operations Manager 2012 online release notes (technet.microsoft.com/en-us/library/hh561709.aspx).

Ticket ID	Description
SCOM-238811	The detection of DS8000 storage systems stops if volumes on these systems have names with non-ASCII characters. Currently there is no workaround or solution for this limitation (SCOM-238811).

Ticket ID	Description
SCOM-260923	<p data-bbox="760 222 1453 317">In some cases, the monitoring host can not be discovered after a certain IBM management pack is manually deleted and then and imported again.</p> <p data-bbox="760 348 1453 506">To resolve this issue, delete the same management pack again and then import it again. Alternatively, you can shorten the management pack object discovery interval to 30 seconds or less (for more information, refer to the relevant Microsoft SCOM documentation).</p>
SCOM-261133	<p data-bbox="760 516 1453 611">After upgrading to the latest version by installing it over version 1.1.0, the configuration that was made with version 1.1.0 is no longer valid.</p> <p data-bbox="760 642 1453 737">To resolve this issue, run the upgrade_config.cmd CLI utility after to the latest version is installed. For more information, refer to the user guide.</p>
SCOM-261147	<p data-bbox="760 747 1453 915">For SAN Volume Controller and Storwize systems, the same event might be displayed several times under Events, each time with a different timestamp. This occurs if the event is reported by the storage system each time with an updated timestamp.</p> <p data-bbox="760 936 1453 999">This is a design behaviour that might be changed in a future management pack version.</p> <p data-bbox="760 1020 1453 1094">Currently there is no workaround or solution for this limitation (SCOM-261147).</p>
SCOM-261151	<p data-bbox="760 1104 1453 1167">Physical drives with an empty enclosure ID are not displayed for Storwize V3500 or Storwize V3700 systems.</p> <p data-bbox="760 1188 1453 1262">Currently there is no workaround or solution for this limitation (SCOM-261151).</p>
SCOM-261196	<p data-bbox="760 1272 1453 1335">XIV volume information is not updated after the volume is migrated to another storage pool.</p> <p data-bbox="760 1356 1453 1430">To resolve this issue, remove the XIV storage system and then add it again by using the scomu.cmd utility.</p>
SCOM-261197	<p data-bbox="760 1440 1453 1535">Information regarding the relationship between FlashCopy consistency group and FlashCopy mapping is not updated for Storwize systems.</p> <p data-bbox="760 1556 1453 1629">Currently there is no workaround or solution for this limitation (SCOM-261197).</p>
SCOM-261198	<p data-bbox="760 1640 1453 1703">For IBM Flex System systems, only the target volume is displayed in the FlashCopy mapping relationship list.</p> <p data-bbox="760 1724 1453 1797">Currently there is no workaround or solution for this limitation (SCOM-261198).</p>

Ticket ID	Description
SCOM-261200	The IBM Storage Management Pack only works when the SCOM Root Management Server (RMS) and SCOM agents reside in the same domain. Currently there is no other workaround or solution for this limitation (SCOM-261200).
SCOM-261238	The digital signature cannot be verified in Windows 2008.
SCOM-261243	The ID and System Name of the system are showing as the same value in the web console.
