

IBM Extended Command-Line Interface (XCLI) Utility
Version 5.2

Release Notes

Second Edition (July 2017)

This edition applies to the IBM XCLI Utility version 5.2 software. Newer document editions may be issued for the same version in order to add missing information, update information, or amend typographical errors. The edition is reset to 'First Edition' for every newly released version.

Overview

IBM® Extended Command-Line Interface (XCLI) utility provides a terminal-based interface for issuing storage system management, monitoring, and maintenance commands from a client computer upon which the utility is installed.

For detailed information about the command-line interface (CLI) commands for a particular storage system, see the CLI Reference Guide of that storage system.

The IBM XCLI Utility software package can be downloaded at any time from the IBM Fix Central website (www.ibm.com/support/fixcentral).

What's new in version 5.2

Version 5.2 of the IBM XCLI utility is a minor release that updates the supported Java version to 7 update 131, and thereby resolves security issues in the previously supported Java version. In addition, version 5.2 of the IBM XCLI utility introduces an important usability enhancement.

For more information, see Version 5.2 (June 2017).

Compatibility

This section details the compatibility of IBM XCLI utility version 5.2 with storage system versions and operating system versions.

Supported storage systems

Version 5.2 of the IBM XCLI utility supports the following storage system versions:

Storage system	Microcode version
IBM FlashSystem® A9000R	12.0.x - 12.1.x
IBM FlashSystem A9000	12.0.x - 12.1.x
IBM XIV® Storage System (model 281x-A14)	10.2.4.x
IBM XIV Storage System Gen3 (models 281x-114, 281x-214, and 281x-314)	11.1.1 – 11.6.x
IBM Spectrum Accelerate™	11.5.0.x – 11.5.4.x

Supported operating systems

Version 5.2 of the IBM XCLI utility supports the following operating system versions:

Operating system	Bit version / CPU architecture
Microsoft Windows Server 2008	32-bit or 64-bit
Microsoft Windows Server 2012 R1 or R2	64-bit
Microsoft Windows 7	32-bit or 64-bit
Microsoft Windows 8	32-bit or 64-bit

Operating system	Bit version / CPU architecture
Microsoft Windows 10	32-bit or 64-bit
Red Hat Enterprise Linux (RHEL) 6.x-7.x	32-bit or 64-bit
HP Unix (HP-UX) 11i v3	Intel IA [®] -64
IBM AIX [®] 6.x – 7.x	N/A
Oracle Solaris 11	SPARC or Intel x86-64

Installation notes

This information describes how to install the IBM XCLI utility.

Perform one of the following procedures for your operating system.

- **Windows:** Double-click the installation file, and follow the instructions on the screen.
- **Linux:** Extract the installation file to a designated folder on your system, using the following command:

```
tar -xzf file_name.tar
```
- **AIX, HP-UX, Solaris:** Extract the installation file using the following command:

```
gunzip file_name.tar.gz
```

 Then extract the file to a designated folder on your system, using the following command:

```
tar -xvf file_name.tar
```

Change log

This change log summarizes the changes that were made in recent 5.x code level versions of IBM XCLI Utility.

Note: New functional features of these versions are only briefly summarized. For a detailed summary of the new functional features of a specific version, refer to the 'What's new' section of its individual release notes.

Version 5.2 (June 2017)

Version 5.2 of IBM XCLI Utility updates the supported Java version to 7 update 131, and thereby resolves security issues in the previously supported Java version. In addition, version 5.2 of the IBM XCLI utility introduces an important usability enhancement, as listed in the following table.

Ticket ID	Description
PUI-12222	Enhancement: The font size in the XCLI utility window is now customizable. To increase the font size, press CTRL+ . To decrease the font size, press CTRL- .
PUI-12015	Enhancement: The supported Java version is updated to 7 update 131. This Java version resolves security issues in the previously supported Java version.

Version 5.1 (November 2016)

Version 5.1 of IBM XCLI Utility introduced a number of security enhancements and resolves a few miscellaneous issues, as listed in the following table.

Ticket ID	Description
UI-265822	<p>Enhancement: The direct command line login in the XCLI utility can now be disabled. To disable it, in the GUI12\xiv-general.properties file, do one of the following:</p> <ul style="list-style-type: none">• Change the value of the parameter <code>xcli_direct_login_enabled</code> to <code>false</code>• Add the string <code>xcli_direct_login_enabled=false</code> <p>Note: Prior to modifying the <code>xcli_direct_login_enabled</code> parameter, make sure that the XIV GUI is closed. Otherwise, the changes will not be applied.</p> <p>If the direct login is disabled, all direct authentication attempts will fail (command line arguments <code>-u</code> and <code>-p</code> are prohibited).</p>
UI-265821	<p>Enhancement: If the credentials file is created with the <code>--protect</code> argument, only the user running the command has read/write permissions to this file. No permissions are granted to any other user.</p>
UI-265820	<p>Enhancement: Starting from version 5.1, user passwords are not retained in XCLI or GUI log files.</p>
UI-265819	<p>Enhancement: Weak cryptographic algorithms used for obfuscation of user credentials in previous versions have been thoroughly enhanced and strengthened.</p>
UI-265818	<p>Security enhancement: User credentials are now required every time when launching the XCLI utility or XIV Top from the XIV GUI.</p>

Limitations

Currently there are no functional limitations in IBM XCLI utility version 5.2.

Known issues

This section details the known issues in IBM XCLI utility version 5.2, along with possible solutions or workarounds (if available).

The following severity levels apply to known issues:

- **HIPER** – High Impact Pervasive. A critical issue that IBM has either fixed or plans to fix promptly. Requires immediate customer attention or code upgrade.
- **High Impact** – Potentially irrecoverable error that might impact data or access to data in rare cases or specific situations/configurations.
- **Moderate** – Limited functionality issue and/or performance issue with a noticeable effect.
- **Service** – Non-disruptive recoverable error that can be resolved through a workaround.
- **Low** – Low-impact usability-related issue.

Ticket ID	Severity	Affected versions	Description
PUI-13473	Service	5.2	<p>The IBM XCLI utility installation on Windows 10 fails with an error message.</p> <p>Workaround: In the command prompt, run the following: <code>setx JAVA_TOOL_OPTIONS "-Dos.name='Windows 7'"</code></p>

Related information and publications

You can find additional information and publications related to the IBM XCLI utility on the following information sources:

- IBM FlashSystem A9000R on IBM Knowledge Center (ibm.com/support/knowledgecenter/STJKN5)
- IBM FlashSystem A9000 on IBM Knowledge Center (ibm.com/support/knowledgecenter/STJKMM)
- IBM XIV Storage System on IBM Knowledge Center (ibm.com/support/knowledgecenter/STJTAG)

Getting information, help, and service

If you need help, service, technical assistance, or want more information about IBM products, you can find various sources to assist you. You can view the following websites to get information about IBM products and services and to find the latest technical information and support.

- IBM website (ibm.com®)
- IBM Support Portal website (ibm.com/storage/support)
- IBM Directory of Worldwide Contacts website (ibm.com/planetwide)
- IBM service requests and PMRs (ibm.com/support/servicerequest/Home.action)

Use the Directory of Worldwide Contacts to find the appropriate phone number for initiating voice call support. Voice calls arrive to Level 1 or Front Line Support.

Notices

These legal notices pertain to the information in this IBM product documentation.

This information was developed for products and services offered in the U.S.A. This material may be available from IBM in other languages. However, you may be required to own a copy of the product or product version in that language in order to access it.

IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not grant you any license to these patents. You can send license inquiries, in writing, to:

*IBM Director of Licensing
