

APAR IZ68517
 (Port of ITIM 5.0 APAR IZ64846)

Symptom: Documentation Update:

ACI for Person in ITIM 4.6 shows the option 'supervisor', in ITIM 5.x this appears to be replaced by the option 'The manager of the profile owner', there is some confusion among customers as the documentation for default ACI for person still shows this as supervisor and not 'manager of the profile owner', also the relationship shown in LDAP for a Person ACI still refers to supervisor:

```
<principals>
<systemRole>erglobalid=00000000000000000034,ou=sysRoles,erglobalid=00000000000000000000,ou=org,dc=com</systemRole>
  <relationship>administrator</relationship>
  <relationship>sponsor</relationship>
  <relationship>supervisor</relationship>
</principals>
```

Note:

The 'Supervisor' label in ITIM 4.6 Person/ BPPerson ACI is replaced by the 'The manager of the profile owner' in ITIM 5.x. The selection of 'The manager of the profile owner' option in the Person/BPPerson ACI, will grant permissions to the 'Supervisor' of Organization unit and to the manager of the person.

This issue will be documented in future updates of the infocenter at link http://publib.boulder.ibm.com/infocenter/tivihelp/v2r1/index.jsp?topic=/com.ibm.itim.doc/cpt/cpt_ic_admin_au_thoriz_acidefault.html as;

Name	Protection Category	Type	Principal
Default ACI for Person: Grant All to Supervisor/Domain Admin/Sponsor/Help Desk Group	Person	erPersonItem	Supervisor/ Manager Domain Admin Sponsor Help Desk Group
Default ACI for BPPerson: Grant All to Supervisor/Domain Admin/Sponsor/Help Desk Group	Business Partner Person	erBPPersonItem	Supervisor/ Manager Domain Admin Sponsor Help Desk Group

Note: Please note that added document is in BLUE color under Principal column.
