The following changes to IBM TRIRIGA are in this release.

| Area of Change    | Description   |
|-------------------|---|
| Real Estate Lease | Resolved an issue where the tenant improvement incentive was deducted from the minimum lease payments (MLP), for example the rent, for current accounting standards. (Tri-115633) |
| Real Estate Lease | The minimum index adjustment/actual adjustment now is correctly applied to the FLIs for both current standard and exposure draft. (Tri-115634)                                    |

|                                  |  |
|----------------------------------|--|
| Real Estate Lease                | The residual value guarantee is now reflected for the schedule type A/type B from the history lease when a lease is extended through the amendment process. The residual value was being reflected only for the last period and not for the original period before extension. (Tri-115635) |
| Real Estate Lease                | When the Review Assumptions action is submitted, all actions are removed until the calculations are complete to avoid incorrect data calculations. (Tri-115010)  |
| Workplace<br>Reservation Manager | Fixed an issue where one-time reservations that had extended setup/breakdown durations were incorrectly being accepted when the extended time conflicted with another reservation. (Tri-115568-IV52853)  |
| Workplace<br>Reservation Manager | Fixed an issue where series reservations were not being declined when the reservation occurred outside the room's calendar. For example, a series occurrence showed as accepted on a weekend for a room having a Monday-Friday calendar. (Tri-115711)                                      |
