

## WebSphere RFID Premises Server installation fails to create the JDBC provider

### Technote (FAQ)

#### Question

After installation, the WebSphere® RFID Premises Server applications do not start within the WebSphere Application Server profile.

#### Cause

Errors in the *IBM\_RFID\_HOME*\logs\install.log file indicate that the JDBC provider was not created. These errors might include the following:

```
WASX7017E: Exception received while running file
"eventserver_config.jacl"; exception information:
com.ibm.ws.scripting.ScriptingException:
WASX7077E: Incomplete config id: need closing
parenthesis in "0"
```

```
WASX7017E: Exception received while running file
"commserv_config.jacl"; exception information:
com.ibm.ws.scripting.ScriptingException:
WASX7077E: Incomplete config id: need closing
parenthesis in "0"
```

```
WASX7017E: Exception received while running file
"kimono_config.jacl"; exception information:
com.ibm.ws.scripting.ScriptingException:
WASX7077E: Incomplete config id: need closing
parenthesis in "0"
```

#### Answer

This problem was reported in APAR IC53646. To resolve this problem, contact IBM® Support and reference this technote.
