

**Version 2.2****Quick Start Guide**

*This guide gets you started with a typical installation for the Enhanced Support for SWIFTNet FileAct feature of IBM WebSphere Business Integration for Financial Networks for Multiplatforms V2.2.*

**Product overview**

The Enhanced Support for SWIFTNet FileAct feature of IBM® WebSphere® Business Integration for Financial Networks (abbreviated to WebSphere BI for FN) for Multiplatforms V2.2 uses SWIFTNet FileAct to let applications:

- Send files to and receive files from remote locations in the SWIFT Secure IP Network (SIPN).
- Download files from remote locations.
- Provide files for downloading by remote locations.

Administration and operation commands let you:

- Monitor the status of each file.
- Start and stop the file processing services for a particular organizational unit independently of WebSphere BI for FN and the SWIFTAlliance Gateway (SAG).
- Retry attempted file transfers that are in a recoverable error state.

The Enhanced Support for SWIFTNet FileAct feature employs SWIFTNet Link (SNL) primitives and supports SWIFTNet 5.0 and SWIFTNet 6.0 FileAct counterparties.

This package provides you the WebSphere BI for FN feature Enhanced Support for SWIFTNet FileAct for AIX® platform.

**1 Step 1: Access your software and documentation**

This package includes:

- WebSphere BI for FN for Multiplatforms V2.2 Enhanced Support for SWIFTNet FileAct CD

The WebSphere BI for FN product software can be accessed from the product CD or downloaded from Passport Advantage® at <http://www-306.ibm.com/software/howtobuy/passportadvantage/>.

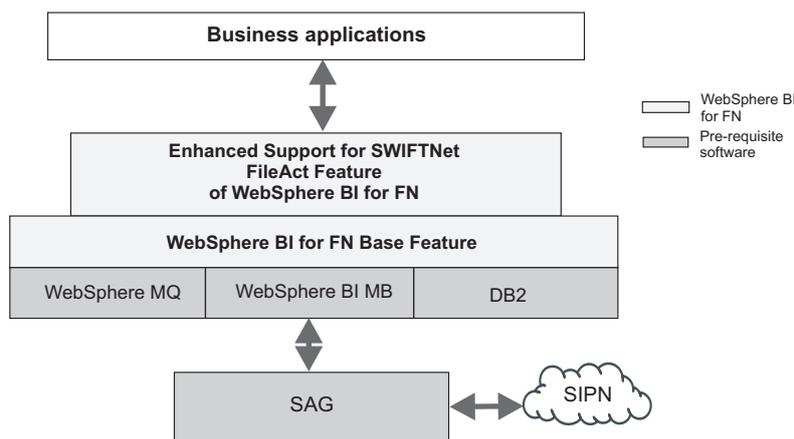

The WebSphere BI for FN product documentation can be accessed through the IBM Publication Center at <http://www.ibm.com/shop/publications/order> or the WebSphere BI for FN library page at <http://www-306.ibm.com/software/integration/wbifn/library>.

**2 Step 2: Evaluate your hardware and system configuration**

Detailed system requirements are documented in *WebSphere BI for FN for Multiplatforms: Planning, Installation, and Customization* available at IBM Publication Center or the WebSphere BI for FN library page.

### 3 Step 3: Review the base architecture

The following diagram depicts the relationship between the Enhanced Support for SWIFTNet FileAct feature of WebSphere BI for FN and the pre-requisite software.

For details of the WebSphere BI for FN architecture and concepts refer to *WebSphere BI for FN for Multiplatforms: Concepts and Components*.

### 4 Step 4: Install the pre-requisite software

Install the pre-requisite software:

- IBM WebSphere Business Integration for Financial Networks V2.2 Base
- IBM WebSphere Message Broker V6
- IBM WebSphere MQ V6
- DB2<sup>®</sup> Enterprise Server Edition V8.2 or V9.1
- SWIFT Alliance Gateway 6.0
- Java<sup>™</sup> Runtime Environment for AIX 1.4.2

For a detailed instruction how to install these products refer to the corresponding product documentation.

### 5 Step 5: Install the Enhanced Support for SWIFTNet FileAct feature of WebSphere BI for FN for Multiplatforms

Before you begin installing and customizing the Enhanced Support for SWIFTNet FileAct feature of WebSphere BI for FN, you need to make decisions that will affect your setup. For a detailed description of all planning and installation tasks see *WebSphere BI for FN for Multiplatforms: Planning, Installation, and Customization*.
